XHigherEducationInstitutionExchange (XHEIE)

Standardisation for the implementation of the Online Access Act in the context of higher education institutions

The Online Access Act (OZG) orders all German higher education institutions to offer their students services digitally for the citizens by 2022.
In order for the implementation to succeed, data exchange between the higher education institutions must be standardised wherever possible. The goal is to prevent discontinuity in media when it comes to application procedures. The requirement for reaching the goal is for IT-systems to be able to work together (Interoperability). Together we will develop an interoperability standard, which will provide a basis for data exchange without media discontinuity.
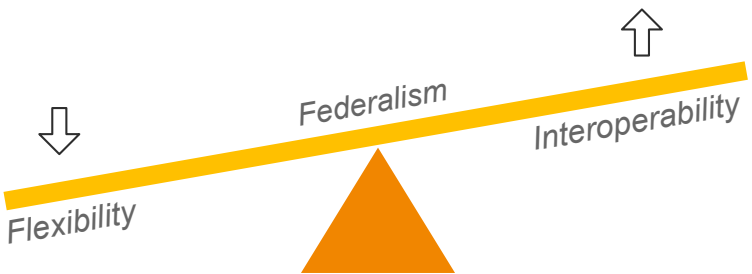

Introduction

The demand for standardisation is being described and developed in the specifications of "XHochschule" and "XBildung".
The group of experts and us activley work together in online working groups to develop a specification on data exchange.
Be part of the journey to the harmonisation of data exchange between higher education institutions.
Join us in finding a solution for conciliating as much federalism, autonomy of universities and flexibility as possible, with as much interoperability as possible.

Flexibility

Federalism

Interoperability

The network

There are 65 experts from all over Germany already participating in the project. Many come from higher education institutions, federal ministries, foundations or associations.

Crucial points for developing the standard "XHochschule"

We recommend compliance with the following principles:

• Consideration of the administrative system (Federal States, Universities, Federal Ministries, etc.)

• Broad and open participation whenever possible (e.g. public participation process, call for comments)

• Consideration of the tight time frame (Deadline for implementation until the end of 2022)

• Ensuring interoperability and utilisation of established standards (e.g. XÖV, XInneres)

• Integration of established OZG-components (e.g. Nutzerkonto, ePayBL)

• Integration of European projects (e.g. Platform for International Student Mobility - PIM, Erasmus without Paper, European Student Card, Europass)

Virtual Workshops

20 April 2020
Kick-off - XBildung & XHochschule

6 May 2020
Online Workshop 1 - Higher Education Institution Certificate I

3 June 2020
Online Workshop 2 - Shifting between higher education institutions I

24 June 2020
Online Workshop 3 - Higher Education Institution Certificate II

8 July 2020
Online Workshop 4 - Shifting between higher education institutions II

21 July 2020
Online Workshop 5 - XBildung

5 August 2020
Online Workshop 6 - Scope Statement & Requirements Specification XHochschule

18 August 2020
Online Workshop 7 - Scope Statement & Requirements Specification XBildung

23 September 2020
Online Workshop 8 - Finalisation & Conclusion XHochschule & XBildung V0.1

Get involved

Becoming a part of the team and contribute with your expertise in one or more of the topics. Do not hesitate to contact us. Just send an e-mail to xhochschule@init.de stating that you want to participate.
